100-foot energy storage container for cement plants

Overview

What are cement storage silos?

Cement storage silos are on-site storage containers that used for the storage and distribution of various types of cement mixtures. Spiral steel silos for cement storage come in a variety of sizes, which makes them ideal for both large-scale and small-scale cement plants.

What type of storage silo does AGICO cement provide?

AGICO Cement provides spiral silo, welded silo, bolted silo storage solution according to our customer's local condition and requirements. As one of the most successful storage silo solution manufacturers in China. AGICO Cement storage silo supplies various storage silos for bulk materials storage.

How many tons can a cement storage silo hold?

In real world application, the cement storage silo can be structured to hold no more than a few tons of dry cement production, or be designed to efficiently hold several hundred tons. Generally speaking, cement storage silos with big size are cannot be moved because of permanent structures.

What is the storage principle of a portable cement silo?

The storage principle of the portable cement silo is quite easy, since the components can be stored in a warehouse until the device is needed at another building site. As a necessary equipment of cement storage silos, blowers are necessary for both the permanent and the portable cement silo.
