

# 100 kW wind power generation system

## Overview

---

How many homes can a 100kW wind turbine power?

A 100kW wind turbine produces enough energy to power around 15 homes. These turbines are not for residential use but are community-sized wind turbines that provide the appropriate amount of power for schools and university campuses, residential developments, farms, municipalities, and a variety of businesses ranging from injection molding factories to extrusion houses.

Why is Aeolos H 100kW a good wind turbine?

This makes the wind turbine more reliable and more safety. Aeolos H 100kw has the 24.5 m rotor diameter which is larger than most 100kw wind turbines. It will reach the 100kw output at 10 m/s wind speed Directly Connection Without Flanges and there is more power output in low wind speed area.

What is the annual power output of Aeolos-H 100kW wind turbine?

The annual power output is about 448407 kwh at 8 m/s wind speed. Aeolos-H 100kw hub and nacelle are all casting parts followed by IEC 61400 -2 standard. The nacelle and hub were made by EN-GJS-400-LT which is the same material and technology as MW wind turbines.
