

100W Solar Fan

Overview

How much does a solar fan weigh?

It uses an off/on switch to save energy and has an 8.2-foot cable for connecting to either the solar panel or a DC outlet. This small solar-powered fan has a diameter of 7.8-inches and the whole thing weighs only 10.4 ounces. Note: The fan does not come with a solar panel. You will need to purchase this separately.

What is the Best Fan for solar?

The best fan for solar will depend on how you intend to use it. Below is a brief overview of each type so you know what to expect. Ceiling fans use anywhere from 55W (36 inch blades) to 90W (52 inch blades). These are ideal if you want to cool an entire room. Installing won't be as easy as the other fans, but it can be done.

How much rpm can a solar fan run?

☐☐When the sun is directly on the solar panel, the fan can be up to 3000 rpm. When the sun is weak, the fan will work slowly or even stop working.
☐Waterproof Coating☐Fan motor parts (PCB board, wiring, bearings) have been coated to prevent short circuit or damage from rain.

How does a dual fan solar panel work?

☐Temperature Reduction☐The dual fan solar panel kit pushes the hot air out, effectively reducing the indoor temperature. ☐☐When the sun is directly on the solar panel, the fan can be up to 3000 rpm. When the sun is weak, the fan will work slowly or even stop working.
