1200W portable power station in Toronto

Overview

When was Toronto power station built?

The station was built for the Electrical Development Company of Ontario to supply 25-cycle power to Toronto. Construction began in 1903 and it operated from 1906 until 1974. In 1983 it was designated as a national historic site in Canada. For its time, it represented a milestone in engineering and technology.

Where is the Toronto Power Generating Station?

The Toronto Power Generating Station is a former generating station located along the Niagara River in Niagara Falls, Ontario, Canada, slightly upstream from the newer Rankine Generating Station.

Who designed the Toronto Power Generating Station?

Completed in 1906 and designed by Toronto architect Edward James Lennox (who also designed the 'old' Toronto City Hall), the Toronto Power Generating Station held eleven turbines that produced 11,000 horsepower each and later upgrades pushed the output to 137,000 horsepower (Opacity, 2011).
