

12V to 60V step-up inverter

Overview

What is a 6V to 12V converter (inverter)?

The PGPI is a 6V to 12V converter for vehicles that still have a 6V, positive ground electrical system. It is necessary if you are still running positive ground for all of our radios, which run on a 12V, negative ground electrical system. The PGPI positive ground inverter comes with detailed wiring instructions.

How do I choose a 12-volt inverter?

To choose a 12-volt inverter, add together the wattage of all the electronic devices and appliances being plugged in and select a suitable inverter. Remember, we offer Free Delivery on any 12-volt inverter when you spend over £50. We also stock 24v inverters; please [click here](#).

How does a 12V to 120V inverter work?

Dave Orton on the Sprinter Forum pioneered the use of a 12v to 120v inverter to take 12v power from the running engine and turn it into 120v, then send that 120v power to wherever the house battery is placed. The 120v runs a charger (or runs through an inverter) to recharge the house battery. Why would you do this?

The inefficiencies are crazy.
