# 15MWh Solar Container for Field Operations in the EU

## Overview

---

How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

How many solar PV modules are made in Europe?

Today, at least 38 European solar PV module production equipment manufacturers operate on the continent, in nine countries (DE, FR, IT, NL, CH, ES, HU, FI, NO). Most - 75% - are active in the cells and modules equipment manufacturing segment.

What is the role of European companies in the solar industry?

In the solar sector, European companies originally played a key role in developing the production equipment needed for the mass production of solar wafers, cells, and modules. While the rise of China's solar manufacturing sector initially provided a significant export market, a highly competitive local industry has since emerged.
