

# 15kW Mobile Energy Storage Container Service Quality

## Overview

---

What is the maximum output power of the pc15kt mobile energy storage system?

The maximum output power is 22kW. The system intelligently balances between battery and generator power. During the power surges (e.g., pump startup), the system can provide instant power support when generators need supplemental power. 9. What certifications are currently being planned for the PC15KT mobile energy storage system?

.

What is a container energy storage system?

The container energy storage system helps to use and manage energy more effectively, reduce electricity bills, and can be applied in various scenarios such as peak valley arbitrage for power users, frequency regulation and peak shaving for power grids, improving new energy consumption, and improving power supply stability for power grids.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
