Overview

How many Li-ion cylindrical battery cells are there?

This paper investigates 19 Li-ion cylindrical battery cells from four cell manufacturers in four formats (18650, 20700, 21700, and 4680). We aim to systematically capture the design features, such as tab design and quality parameters, such as manufacturing tolerances and generically describe cylindrical cells.

How to design cylindrical Li-ion battery cells?

A generic overview of designing cylindrical Li-ion battery cells. Function 1: Two types of jelly roll designs can be distinguished: With tabs and tabless. Jelly rolls with tabs can be realized with a single tab (Design A) or several tabs in a multi-tab design (Design B).

Who makes 4680 battery cells?

The cells are from five established manufacturers (Sony/Murata, Panasonic/Sanyo, LG, Samsung SDI, and Tesla). The 4680 battery cell was taken from a Tesla vehicle and produced by Tesla itself. The investigated cells and their nominal capacity are listed in Table 1. Table 1. Investigated battery cells.

When did Li-ion batteries come out?

Sony first commercialized LIBs in 1991 for consumer electronics , and since then, advancements in materials and processes have reduced costs and improved energy and power density, lifetime, and safety . However, the rapid electrification of the transport sector requires further developments in Li-ion battery technology.
