

## 2 solar panels for home use

## Overview

---

Selecting the best solar panels for your home is important, as this will ensure you get the most out of your solar energy system. Here are our top solar panel picks:

### How many solar panels do I Need?

The number of solar panels you'll need for your home will vary based on factors specific to you, including the size of your home, energy needs, and location. However, the average home needs between 17 and 21 solar panels to completely offset utility bills.

### Which solar panel is best for home use?

This way, you can get the best price for your new system. Which type of solar panel is best for home use?

Generally speaking, monocrystalline panels are the best option for home use. However, polycrystalline and thin-film panels can be good options depending on the size of the system and other factors specific to you.

### How to choose a residential solar panel?

So, if you live in a hot climate, ensure you pick a panel with a lower coefficient ( $-0.35\%/^{\circ}\text{C}$  is the industry average), as this will ensure better savings and higher energy production. Panel efficiency and wattage: Choose a residential solar panel with efficiency and wattage ratings that match your home's energy needs.

### What factors should you consider when buying a solar panel?

Efficiency range (20 points): Solar panel efficiency is one of the most important factors to consider when looking for a new solar panel for your home. Efficiency is how much energy a solar panel can convert from the sun into usable energy for your home.
