

# **20kW Mobile Energy Storage Container**

## Overview

---

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

Why do companies bid for energy storage tenders?

Bidding for energy storage tenders is extremely lucrative for companies of all sizes. Tendering authorities and private companies release thousands of contracts worth millions for procurement of energy storage. Global Tenders stands out as the largest platform dedicated to tenders and government contracts.

How much energy storage was deployed in 2024?

Approximately 11.9 gigawatts (GW) of storage was deployed in 2024. In only the third quarter of 2024, and despite mounting concerns over potential trade and policy developments, the US storage market added a record-setting 3.8 GW of energy storage—an 80% increase compared to the prior year.

Are energy storage projects a meter utility scale project?

The majority of new energy storage installations over the last decade have been in front of the meter utility scale energy storage projects that will be developed and constructed pursuant to procurement contracts entered into between project developers (or a special-purpose project company owned by such developers) and the utilities.
