# 21700 Battery Cell Production

## Overview

---

Who makes 21700 battery cells?

In the research and production of 21700 battery cells, BAK Battery has consistently maintained an advanced layout and technological leadership. They continuously break through the capacity ceiling of 21700 battery cells, successively releasing and mass-producing 21700-5.0Ah and 21700-5.3Ah battery cell products.

Which 21700 battery has the highest capacity?

Presently, the highest capacity available in the market is the 21700-5.3Ah. The production of the BAK 21700-5.5Ah cell signifies a new peak in domestically produced 21700 cell capacities. BAK Battery has consistently maintained a proactive stance and technological edge in the research and production of 21700 cells.

What are the applications of 21700 battery cells?

This tendency is especially noticeable in applications such as two-wheel transport tools, smart home products, electric tools, consumer electronics, and portable energy storage. The designed capacity of 21700 battery cells has always been growing with their commercial applications expanding.

Is 21700 a good battery cell?

In comparison with other types of lithium ion battery cells, 21700 is of course not the best Performance ever battery cell, but it is the best choice for energy density and energy cost. The physical dimensions of the cylindrical cores increase not only the energy density but also the productivity coefficient of cyclic life.
