Can a 24kW solar array be put on an inverter?

A 24kW solar array can be put with an inverter with an AC output of 18.00kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

Is a 6 kW inverter worth it?

The combination of these two things means that it's probably not worth your while having a system at 6 kW. A 5 kW inverter will be the most cost effective. And the extra 1 kW of panels means that you'll get best use out of your inverter - it will spend more time running at its peak output.
