## 24v inverter changed to 60v

## Overview

---

Where can I buy a 24 volt inverter?

Shop now at RoadKing and get the power you need wherever your journey takes you. A range of 24v to 240v mains inverters including power, soft start & pure sine wave 24 volt inverters, Shop for a Waeco, Skytronic or RoadKing 24v inverter.

How much power does a 24V inverter consume?

A good sized 24V inverter could use about as much power just being on as your lights do. If the lights consume 45 watts and run for 12 hours a day, the total power usage would be  $45 \text{ watts} \times 12 \text{ hours} = 540 \text{ watts}$ . The battery power required for losses plus the load could double that. The lights themselves may be DC, using a small transformer (wall wart) to go from 120Vac to (likely) 12Vdc.

What is the difference between a 24v and 12V inverter?

The main difference is the input voltage. A 24V inverter is suited for larger battery systems and can handle more power, making it ideal for bigger appliances. A 12V inverter is typically used for smaller systems and devices. Need more help?

What does a 24V battery inverter do?

A 24V battery inverter is a device that converts 24V battery output (DC, or direct current) into 230V mains output required for domestic appliances (AC, or alternating current). It can also function as a backup / emergency power source in case of power cuts.
