Which port in Brazil handles the most cargo in 2023?

In Brazil, both public and private ports are highly active. The Port of Santos, the largest port, handled 166 million tonnes of cargo in 2023, including solid and liquid bulk, container cargo, and general cargo. Similarly, Porto do Açu is a major port specializing in dry bulk, breakbulk, and liquefied natural gas.

Can Brazilian ports be key hubs for renewable fuel production?

Brazil's abundant renewable energy resources and location enable it to play a unique role in ramping up renewable fuel production for use in the maritime shipping sector. This study explores the potential of Brazilian ports to become key hubs for supplying renewable hydrogen and its derivatives, renewable ammonia and renewable methanol.

Are Brazilian ports ready for renewable marine fuel bunkering?

This helps provide a foundation for future investment and policy decisions aimed at developing green shipping infrastructure in Brazil. Our port readiness assessment identified six Brazilian ports as candidate hubs for renewable marine fuel bunkering.

What type of cargo is handled in Brazil?

It handles a wide variety of cargo, including containers, bulk liquids, and dry bulk goods such as soybeans and sugar. Port of Paranaguá: Located in the state of Paraná, the Port of Paranaguá is Brazil's second-busiest port, handling a range of cargo including agricultural products, mineral products, and manufactured goods.
