300mw solar module price

Overview

What is a 300MW solar module line?

A 300MW solar module line is an automatic production line of solar modules. All of the individual equipment has high automation, lowering manual cost and lifting production efficiency. Strong compatibility: the 300MW line can produce various types of solar panels, single and dual-glass, 5BB-12BB and monocrystalline and polycrystalline silicon.

What is the working noise of a 300MW solar module line?

Working noise: ≤ 70 dBA. A 300MW solar module line is an automatic production line of solar modules. All of the individual equipment has high automation, lowering manual cost and lifting production efficiency.

How big a solar cell can a production line make?

Strong applicability: the production line can make solar panels with each weighing up to 50kg and of a size up to 2,500mm*1,400mm. The biggest solar cell the line adapts to is M12 (210mm). The turnkey line can meet demands of customers of various types and scales.

Why should you choose a solar module line?

Smart management: the production line is equipped with a smart MES system for production data monitoring, ensuring accurate and timely access to related data and visual data management. High efficiency: the solar module line runs a cycle for 20 seconds and supports 1/3, half and full cell stringer machines, boosting the production efficiency.
