

# **30kW Photovoltaic Container for Weather Station**

## Overview

---

How does a photovoltaic weather station work?

The solar panels of the photovoltaic weather station are responsible for capturing solar energy and converting it into electrical energy to provide power for the entire weather station. The mounting bracket firmly supports the solar panel to ensure its orientation angle and better receive solar energy.

What is a solar weather station?

PV weather station designed for solar operation. The solar panels of the photovoltaic weather station are responsible for capturing solar energy and converting it into electrical energy to provide power for the entire weather station.

What is Renke PV weather station?

Renke PV weather station provides accurate monitoring of solar radiation, temperature, wind, and environmental conditions for solar farms. Improve energy output.

How many sensors can a PV weather station support?

This PV weather station supports multiple sensor configurations, including automatic solar radiation sensors, a temperature and humidity sensor, a wind speed and direction sensor, a barometric pressure sensor, and so on.

## 30kW Photovoltaic Container for Weather Station
