40-foot solar-powered container for wastewater treatment plants

Overview

How long does a containerized wastewater treatment plant take?

We offer a variety of capacities that can meet your requirements. As the pre-assembled containerized wastewater treatment plant is located inside a standard 20 or 40 foot shipping container, it can be relocated and installed with ease at other locations. In most cases it is a one to two-day operation and requires only a flatbed truck and a crane.

What is containerized wastewater treatment?

This is where containerized wastewater treatment is practical. These innovative systems are housed within standard shipping containers, making them: Compact and portable: They require minimal space and can be easily transported wherever needed. A standard 20-foot container can hold a system capable of treating wastewater for dozens of people.
