

# 48v200ah lithium iron phosphate solar container battery

## Overview

---

What is a lithium iron phosphate battery?

The Lithium Iron Phosphate Battery refers to the 48v 200ah lifepo4 lithium-ion battery with  $\text{LiFePo}_4$  as the positive electrode material.

What is lithium phosphate?

In terms of material principle, lithium phosphate also contains an embedding and de-embedding process, which is the same as lithium cobalt and lithium manganese. We designed the new 48v 200ah lifepo4 battery pack using high-quality lithium phosphate cells with the highest safety standards and optimal battery structure.

Which anode material is used in lithium ion batteries?

The anode materials of lithium-ion batteries mainly include lithium cobaltate, lithium manganese, lithium nickelate, ternary materials, lithium iron phosphate, and so on, among which lithium cobaltate is the anode material used in the vast majority of lithium-ion batteries.

What is a lithium iron phosphate cell used for?

The 3.2V 150Ah Lithium iron phosphate cell with a long life-cycle of 3000 times for: 12V/24V solar energy storage power system, UPS supply engine starting battery, electric bicycle/motorcycle/scooter, golf trolley/carts, power tools, wind power system, RV and caravan.
