4V high power inverter

Overview

What is a high voltage inverter?

To power motors or other devices, high-voltage inverters convert direct current (DC) from batteries or generators to alternating current (AC). With nominal DC voltage up to 1 kV and maximum power up to 300 kW each, our inverters support a variety of applications including traction drives, grid connections, and island grids.

What is high frequency power inverter?

The high voltage frequency converter integrate the most advanced motor vector control algorithm, high control precision, fast response, low frequency, high torque. Our high frequency power inverter can be applied to energy-saving speed regulation and process improvement of high-voltage asynchronous motors and synchronous motors.

What is a 400V inverter?

The 400V inverter is the brain at the heart of the electric powertrain, it controls the electric motor. It converts Direct Current (DC) from the battery to Alternative Current (AC) to power the electric motor.

What is a 4th generation inverter?

The fourth generation inverters are available as attached or integrated solution and are applicable on 400 V as well as on 800 V. more range, depending on use-case on vehicle level higher power density compared to previous generation with more than 50 kVA/L and small installation size leads to low vehicle integration effort
