

# **500v high voltage solar container lithium battery pack**

## Overview

---

What is a 500V lithium battery?

Compared to lead-acid batteries, the 500V lithium battery takes up less space and offers greater adaptability to various applications. Our system uses a modular design, making it easy to expand capacity. At the same time, the modular design also facilitates transportation, installation, use, and maintenance.

What are the features of high voltage lithium battery system?

1. 500V 150kWh high voltage lithium battery system, works with inverter, can connect with solar PV array, wind turbine and generator. 2. Key features of high voltage energy storage battery Support different powering source, such solar, wind and generator. Modular design with different density, suits all scenarios.

What is DeLong 500V 80kWh battery pack?

DeLong 500V 80kwh battery pack has a long lifespan and excellent safety performance, suitable for residential, commercial, emergency power, and industrial.

What is the difference between A LiFePO<sub>4</sub> and a 500V battery?

The 80kWh LiFePO<sub>4</sub> battery has a high energy density. It can store more capacity in a smaller size. Compared to lead-acid batteries, the 500V lithium battery takes up less space and offers greater adaptability to various applications. Our system uses a modular design, making it easy to expand capacity.
