550w uninterruptible power supply

Overview

Is 550W power supply enough?

No, even a high quality 550W power supply is not enough for a Ryzen 9 3900X and RX 5700 XT system, as it will use around 450w~480w on max load. While that is true, this leaves relatively little headroom in terms of upgradability.

Will Cyberpower repair or replace equipment if a power surge is damaged?

CyberPower will repair or replace properly connected equipment if it is damaged by a power surge. The CyberPower SX550G uninterruptible power supply (UPS) system provides battery backup and surge protection for lightning-induced surges and other power events that can damage electronic equipment.

Does Cyberpower repair or replace a defective UPS system?

Free software download available. See the Resources tab. CyberPower will repair or replace a defective UPS system (including batteries) within three years of the purchase date. See warranty for details. CyberPower will repair or replace properly connected equipment if it is damaged by a power surge.

How does a Greenpower ups work?

You can maintain safe voltage levels to your equipment with its Automatic Voltage Regulation (AVR). It has an LCD display so you can monitor power and battery conditions, or configure your settings. With GreenPower UPS technology, you can save on energy consumption through improved operating efficiency.
