

# 8kw square wave inverter

## Overview

---

What is a square wave inverter?

The square wave inverter is a type of inverter which converts solar DC power to AC power. The square wave inverter is simpler in design and more efficient than a sine wave inverter. However, the square wave will not be appropriate for some loads, because the large harmonic content can cause interference. Some electromechanical devices.

How many watts can a solar inverter handle?

Solar inverters convert DC solar power into usable household AC power. These inverters can handle a range of power sources from 8,000 watts to 8,999 watts. Compare these 8kW solar inverters from Fronius, SMA, Schneider Electric, Xantrex, PV Powered, Power One, Advanced Energy, Kaco, Outback Power, Magnum Energy.
