What are the most popular solar-plus-storage developments in Africa?

As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2023 (pictured above).

How can energy storage help fill the short-term supply gap?

The report notes this initiative, which is described as a means to fill the short-term supply gap, alleviate the electricity supply constraints, and reduce the extensive utilisation of diesel-based peaking electrical generators. Several initiatives and drivers for energy storage have also been introduced to African countries.

Is solar PV a focal energy resource for Africa?

Solar PV, which, as reported by our colleagues at PV Tech in their write-up of the AFSIA report, reached 19.2GW in 2024, increasing by 2.5GW on 2023 levels, is becoming the focal energy generation resource for Africa.
