

# Angola s new energy solar panel exports

## Overview

---

How many MW of solar power will be installed in Angola?

The projects will be installed in the Moxico, Lunda Norte, Lunda Sul, Bie, and Malanje provinces, adding 296 MW of solar capacity and 719 MWh of battery energy storage system to the Angolan grid. The facilities will provide electricity to power one million consumers. Clean energy firm MCA Group has been tasked with the construction of the projects.

Will a 150 MW solar plant help Angola?

An agreement for the development of a 150 MW solar plant was signed between Angola's Ministry of Energy and Water and UAE-based renewable energy company Masdar in Dubai last December. The 150 MW project will produce electricity to power 90,000 homes, contributing to job creation, emissions reduction and efforts to increase national electrification.

How big is Angola's new solar power plant?

The project has an initial capacity of 35 MW, expected to come on stream during the first half of next year, with possibility of adding another 45 MW during a second phase. A groundbreaking ceremony for the project, which is billed as the largest privately-owned solar power plant in Angola, took place earlier this month.

Where is a 35 MW solar project being built in Angola?

Construction is underway of a 35 MW solar project in Angola. The Quilemba photovoltaic power plant, first announced in October 2021, will be located near Lubango in the south of the country. It is being built by Angolan company Quilemba Solar Lda, a joint venture between TotalEnergies (51%), Sonangol (30%) and Maurel & Prom (19%).
