Arc flash switchgear for sale in Moldova

Overview

What is arc resistant switchgear?

Unlike conventional switchgear, arc-resistant switchgear is designed with reinforced compartments that can withstand incredible pressure increases during high-energy arc faults. Arc-resistant switchgear offers a safe, proven, and cost-effective solution to the problem of arc flash events. Why do I need Arc-Resistant Switchgear?

How dangerous is an electric arc flash in a switchgear?

An electric arc flash is an extremely dangerous and an undesirable event in a switchgear, as temperatures in excess of 20,000 °C and violent overpressure waves are a consequence. Hence, detecting and isolating the system to prevent such a catastrophic event is a top priority.

What is arc-resistant switchgear?

Because arc-resistant switchgear is specifically designed to contain and limit the damage incurred from internal arc faults, it provides the highest degree of protection to personnel, long-term savings, and a significant reduction in downtime.

What is a SELCO arc flash relay?

Circuit breakers or overcurrent protection devices alone do not provide optimal protection for your personnel and equipment. A SELCO Arc-Flash Relay rapidly detects an arc flash and sends a trip signal to interrupt power in milliseconds.
