# Are there any 5G base stations in Antananarivo

## Overview

---

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

How many 5G base stations will India have by 2025?

The country has set an ambitious goal of deploying over 500,000 5G base stations by 2025, a target driven by telecom giants like Reliance Jio and Bharti Airtel. The Indian government has actively supported 5G expansion, conducting large-scale spectrum auctions and offering incentives for infrastructure development.

Which countries have extensive 5G coverage?

The countries with the most extensive 5G coverage include India, which has rapidly expanded its 5G network in the last two years, and much of Europe. Notably, India's neighbors like Pakistan, Myanmar, and even large parts of China have less 5G coverage. In Europe, good coverage extends up to Ukraine, Belarus, and into Russia.
