

# Are there any self-service solar replacement sites in the EU

## Overview

---

Which EU countries use solar energy?

The closest EU Member state is Finland at 43.1%. Yet Sweden's total solar energy output is only 1%. On the other hand, Cyprus is proportionally one of Europe's leading users of solar energy, behind only Greece. Yet other renewable energy sources cumulatively still provide less than the island's reliance on the sun.

Will the EU make solar energy a cornerstone of its future energy system?

With the solar energy strategy announced under REPowerEU, coupled with other legislative measures on renewable energies, the EU is taking the steps necessary to make solar energy one of the cornerstones of its future energy system. carbon-neutral EU, Directorate-General for Internal Policies, November 2021.

How can the EU boost solar energy?

EU measures to boost solar energy include making the installation of solar panels on the rooftops of new buildings obligatory within a specific timeframe, streamlining permitting procedures for renewable energy projects, improving the skills base in the solar sector and boosting the EU's capacity to manufacture photovoltaic panels.

Will Europe have a solar energy future?

A factor that may seem obvious for the future of European solar energy that hasn't materialised in a strong correlation yet, is climate. Despite already impressing with its renewable energy numbers and being far from Europe's sunniest country, Germany leads solar capacity by some distance.
