

# Athens rooftop solar panels

## Overview

---

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

Which countries install solar panels in Greece?

Albania, Bulgaria, Cyprus, Gr. Nik. Ráikos List of Greek solar panel installers - showing companies in Greece that undertake solar panel installation, including rooftop and standalone solar systems.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

How long do solar panels last in Greece?

The payback period for solar panels in Greece typically ranges from 5 to 8 years, depending on factors such as system size, energy consumption patterns, and local electricity rates. After this period, the system continues to generate savings for its 25+ year lifespan. 2. Can off-grid solutions provide reliable power year-round in Greece?

## Athens rooftop solar panels
