Australian Solar Container 200kW

Overview

How much energy does a commercial solar system save in Australia?

On average, businesses in Australia with commercial solar installations of 200kW in size can expect annual energy savings between \$30,000 and \$60,000. This figure will depend on the electricity rate you pay with your energy provider and the amount of solar energy that you self-consume.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing carbon footprint and cutting energy costs.

How big is a 200kW solar power system?

A 200kW system using 370W panels will require about 949.0 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 200kW solar power systems are mostly suitable for Businesses with very high energy needs. This size of solar power system is classed as "Large Scale".

How much can a 200kW solar system save a business?

Businesses installing a 200kW solar system can expect to see impressive savings: Range of Savings: Annually, businesses might save between \$30,000 to \$60,000 on their energy bills, depending on their energy usage patterns, system performance, and local electricity rates.
