

# **Automatic Photovoltaic Containerized Type for Field Research**

## Overview

---

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

What is a photovoltaic container?

This device is usually composed of a standard-sized container equipped with photovoltaic modules, photovoltaic inverters, photovoltaic controllers and batteries. The outer surface of the container is equipped with foldable photovoltaic panels, which can be folded up when not in use to reduce volume and weight for easy transportation and storage.

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

What are containerized mobile foldable solar panels?

Containerized mobile foldable solar panels are an innovative solar power generation solution that combines the mobility of containers with the portability of foldable solar panels, providing flexible and efficient power support for a variety of application scenarios.
