

Azerbaijan Solar Container 60kW

Overview

Is Azerbaijan launching a solar PV project?

In January 2020, Masdar signed an implementation agreement to develop a utility-scale solar photovoltaic (PV) project in the Republic of Azerbaijan. The 230-megawatt (MWac) Garadagh (Area 60) Solar PV Plant is the country's first foreign investment-based independent utility scale solar project structured as a public-private partnership.

Does Azerbaijan need a solar power plant?

The solar power plant has also created new jobs for the local community. Azerbaijan is targeting to increase its installed power capacity to 30 percent from renewable sources by 2030, as the country looks to diversify its economy and reduce greenhouse gas emissions.

What is area 60 solar power?

As the first utility-scale renewable energy project in Azerbaijan, the Area 60 solar power project only uses Sungrow's state-of-the-art 320kW string inverters SG320HX and is compatible with the MV8850-LV MV Stations to ensure the project is safe, highly efficient, easy to operate, and grid-friendly.

Where is Azerbaijan's 230 MWAC PV plant located?

The project entailed developing, financing, constructing, and operating the 230MWac PV plant, located nine kilometers northwest of the Alat settlement in the Republic of Azerbaijan. The plant is started commercial operation in October 2023.
