

Bangladesh Communications 5G Base Station SA

Overview

What is 5G mobile connectivity in Bangladesh?

Recently, fifth-generation (5G) mobile connectivity has been launched in Bangladesh on a trial-run basis. 5G is a super-speed mobile network that is much faster than the existing fourth-generation (4G) technology.

Does Bangladesh support 5G?

The study reveals that none of the major operators in Bangladesh meet the 4G performance standard. Similar results have been discovered in other nations, indicating that the advertised 5G bandwidth is not being delivered. Therefore, the current conditions in Bangladesh do not support favorable 5G deployment.

What are the challenges in implementing a 5G network in Bangladesh?

The major challenges in implementing a 5G network in Bangladesh include the cost of spectrum, equipment, cost, deployment coverage, lack of supported devices, high consumer VAT (value-added tax), short length propagation of mmWave, security, and privacy. This paper will also present the current Internet speed in Bangladesh.

What is the difference between 4G and 5G in Bangladesh?

More specifically, 4G has an average speed of 10 Mbps and 5G has an average speed of 10 Gbps. According to the Bangladesh Telecommunication Regulatory Commission (BTRC), some cities in Bangladesh promised to be covered by the 5G network by 2022.
