# Batteries that can be used with the inverter

## Overview

---

What are the different types of batteries for home power inverters?

Batteries are the backbone of any residential energy storage system, providing backup power when needed. The most common battery types for home power inverters are lead-acid and lithium-ion. Understanding the benefits and limitations of each will help you make an informed decision based on your power needs. Lead-Acid Batteries.

What is a lithium battery for inverter?

Lithium offers unmatched performance, a longer lifespan, and better efficiency than traditional batteries. Whether you're setting up a home backup system, solar power solution, or mobile energy unit, this guide will walk you through everything you need to know about lithium batteries for inverters. Part 1.

Does a lithium battery work with a solar inverter?

While lithium batteries can't work with every inverter, most modern solar and off-grid inverters now offer lithium compatibility. For optimal performance in home energy stems, choose an inverter specifically designed for lithium battery or LiFePO4 battery systems, and always verify compatibility before purchasing.

Do all batteries work with a home power inverter?

Not all batteries work equally well with every type of home power inverter. Ensuring compatibility between your inverter and battery is critical for a successful energy storage system. For off-grid inverter systems, lead-acid batteries are often the go-to choice due to their affordability and long-established use.
