

# **Battery cabinet batteries are different**

## Overview

---

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

What should a battery cabinet have?

Insulation system – insulation is also a safety measure a battery cabinet should have. Grille – it allows for free air flow thereby ensuring efficient cooling. Dual-stage venting system – It is a common technology in electric vehicle battery systems. The first stage will prevent water ingress and equalize pressure.

What are the parts of a battery storage cabinet?

Let's look at the most common parts: Frame – it forms the outer structure. In most cases, you will mount or weld various panels on the structure. The battery storage cabinet may have top, bottom, and side panels. Door – allows you to access the battery box enclosure. You can use hinges to attach the door to the enclosure structure.

What rating should a battery cabinet have?

Indoor battery cabinet should have at least NEMA 1 rating. On the other hand, outdoor enclosures for batteries should have a NEMA 3R rating. It is important to note that the NEMA and IP rating varies depending on where you will install the enclosure. Indoor Battery Box Enclosure 2. Mounting Mechanism for Battery Cabinet
