

# **Belgian 180 Ah solar container lithium battery pack**

## Overview

---

Is a 12V 180Ah LiFePO4 battery suitable for cars?

Absolutely! A 12V 180Ah LiFePO4 battery is suitable for cars, offering compatibility with 12V systems and advantages like longevity and fast charging. Ensure it fits your car's dimensions and follow manufacturer guidelines for charging and maintenance.

How long does it take to charge a 12V 180Ah battery?

Charging a 12V 180Ah battery involves considering charging amperage, battery capacity, and efficiency. The estimated charging times vary with different amperages: 1A takes about 60 hours, 2A takes around 30 hours, 4A takes roughly 15 hours, 6A takes about 10 hours, 8A takes approximately 7.5 hours, and 10A takes about 6 hours.

What is a 10a-ahs battery pack?

The integrated Automatic Heating System (10A-AHS) – will ensure the battery cells are uniformly heated above 0°C as fast as possible to allow the battery pack to accept charging power. Lithium Iron Phosphate (LFP) battery cells cannot be charged below 0°C. Therefore this battery pack is suited for use in sub 0°C climates.

What is a LiFePO4 battery pack?

Basic Info. Our LiFePO4 battery pack is ideal substitute for traditional SLA battery due to its excellent electric performance.
