Our in-house metalworking shop in Großkrotzenburg, Hesse, enables us to guarantee the highest quality standards and offer customized solutions for our customers. How is a solar street light installed?

Does Geo-Technik manufacture solar street lights?

Does Geo-Technik manufacture the solar street lights itself?

Yes, all of our solar street lights, brackets, and special solutions are developed and manufactured by Geo-Technik in Germany. Our in-house metalworking shop in Großkrotzenburg, Hesse, enables us to guarantee the highest quality standards and offer customized solutions for our customers.

Are solar powered garden lights a good choice?

This makes the solar powered solution a great option for garden lights. Just like a solar-powered lamp, battery-powered lighting is a convenient garden choice, since it doesn't need any wires. And just like with a solar-powered lamp, you can move it around as you please. So, when the sky goes dark, you can easily choose where you want to sit.

Are solar street lights a good idea?

Solar street lights use solar energy to generate electricity, making them extremely energy-efficient and environmentally friendly. They help to reduce electricity costs and CO2 emissions. They are also independent of the power grid and ideal for remote areas without existing infrastructure.
