## Overview

---

Are bifacial solar panels available in the UK?

Currently, a handful of manufacturers offer bifacial solar panels in the UK. Below are the available models, all of which are monocrystalline. As time goes by, we're sure to see more manufacturers release their own bifacial solar panels.

What are bifacial solar panels?

Bifacial solar panels (modules) have solar cells on both sides of the unit, with glass on the front and a clear fluoropolymer sheet on the back, allowing them to produce up to 25% more energy than the typical monofacial solar panel widely used today. Bifacial modules can be used with standard racking and inverters for any type of solar array.

How many bifacial panel manufacturers are there?

There are 344 bifacial panel manufacturing companies listed below in the 'Bifacial -- Solar Panel Manufacturers - High Efficiency Crystalline' title.

Are bifacial solar panels the future of solar energy?

Bifacial solar panels, which can collect energy from both the front side and the rear side, are possibly moving more seriously into play now due to cost drops and efficiency improvements. A bifacial solar panel is a solar panel that can collect energy from both sides, while a normal monofacial panel can only collect energy from one side.
