

# Brussels Energy Storage Project

## Overview

---

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore “energy atoll” (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

What is the largest battery storage project in Belgium?

Construction has started on what will be the largest battery storage project in Belgium at 25MW/100MWh when completed later this year. Nala Renewables’ lithium-ion battery energy storage system (BESS) will come online at metals conglomerate Nyrstar’s zinc smelting operation in Balen, in Belgium’s Flemish region, by the end of 2022.

How will a two-phase energy transition work in Belgium?

The two-phase development is set to enhance grid stability and provide reliable, clean energy for up to 96,000 households in Belgium. “Battery storage is one of the most critical, yet often overlooked, components of a successful energy transition.

What is Sungrow's new battery energy storage project?

The largest of its kind on mainland Europe, the project utilizes 320 units of Sungrow's innovative PowerTitan liquid-cooled battery storage units. The second and final phase of this 200MW/800MWh battery energy storage project is set to connect to the grid by the end of 2025.
