

## **C-type battery pack**

## Overview

---

What is a C type battery?

C type batteries are primarily used in applications that require moderate current draw, such as: Their design balances size and capacity, making them suitable for devices requiring longer runtime than smaller batteries. C type batteries offer several advantages, including: Versatility: They can power various devices, from toys to flashlights.

What is a C sized battery?

C type batteries are built to a standard size to ensure maximum compatibility with both devices and accessories such as battery holders. C-sized batteries are smaller than D batteries but larger than AA and AAA batteries. They are: Shop Duracell C-size batteries with RS and make your purchase online today.

What is a C Battery used for?

It is commonly used in flashlights, toys, radios, and musical instruments. Compared with AA batteries, C batteries provide higher capacity (up to 8000-9000mAh) and longer runtime. C type batteries power various devices, from toys to flashlights.

Are C batteries rechargeable?

C batteries come in rechargeable types like NiMH chemistry. These rechargeable C batteries are best for devices that are frequently used since they can be recharged many times and save time and cost. But they come with lower initial voltage than non-rechargeable batteries and longer shelf life.
