

## **C60 inverter**

## Overview

---

What is a C60 controller?

A Controller for Virtually any DC Charging Source. The C60 is a fully solid state, microprocessor-driven controller that is UL and cUL listed. C Series controllers may be configured for PV battery charging, or DC load control or DC diversion operation. Whatever the charging source, a C Series controller is sure to meet your DC controller needs.

What is a C60 charge controller?

To manage larger flows of power, the C60 is the ultimate charge controller for most DIY wind and solar systems. . .

What is a C35 C40 C60 charge controller?

C35, C40 and C60 charge controllers can be used as a charge, diversion, or load controller and come with a standard multi-color charge status LED face plate. A Controller for Virtually any DC Charging Source. The C60 is a fully solid state, microprocessor-driven controller that is UL and cUL listed.

What is a Xantrex C60 charge controller?

The C60 is a rugged 60 Amp controller that is the perfect controller for handling any DC charging source. Xantrex charge controllers are versatile and reliable. The C60 is a 100% solid state, microprocessor-driven controller which is UL and cUL listed.
