

# **Cameroon Douala LNG peaking energy storage project**

## Overview

---

The project consists of the construction of a pipeline linking the countries of the sub-region through the establishment of three multinational oil and gas pipeline systems of approximately 6,500 kilometers, storage depots, liquefied natural gas terminals, refineries and gas-fired power plants linking 11 countries including Cameroon. How much money does Cameroon need to build a solar power plant?

The first two modular solar power plants in Maroua and Guider, with battery storage and a combined capacity of 30 MW, were commissioned in September 2023. The Cameroonian government states that Cameroon needs almost 2000 billion euros to finance its energy projects.

How much money does Cameroon need for energy projects?

The Cameroonian government states that Cameroon needs almost 2000 billion euros to finance its energy projects. These funds will support the construction of the Limbé gas power plant (350 MW), the Grand Eweng, Chollet, Kikot, Katsina Ala (285 MW), and Menchum (72 MW) hydroelectric dams, among others.

How can Cameroon achieve 5000 MW energy production?

To achieve the targeted energy production of 5000 MW, it is advisable to take steps to avoid certain obstacles, similar to those encountered in Cameroon's initial programs. The potential obstacles impacting this objective are listed in Table 6 below: Table 6. Possible obstacles. Lack of proper road infrastructure for site access.

What is the energy potential of Cameroon?

3.1. Government Strategies for Energy Production Cameroon's energy potential primarily comprises hydroelectricity (64%), thermal energy (30%), and other renewable energies (about 6%). The installed capacity increased from 933 MW to 1650 MW by 2020, falling short of the planned target of 3000 MW by a deficit of 1350 MW.

## Cameroon Douala LNG peaking energy storage project

---

### Cameroon Douala Energy Storage Battery Project Powering

The Cameroon Douala Energy Storage Battery Project demonstrates how smart energy infrastructure can power economic growth while meeting climate goals. As battery costs keep ...
