# Can lithium batteries be placed in containers

## Overview

---

What are the lithium-ion batteries in containers guidelines?

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future.

Can lithium-ion batteries be transported safely in containers?

Industry bodies have united to produce "Guidelines for safe transport of Lithium-ion batteries in containers".

Should lithium-ion batteries be stored in fire-resistant containers?

Storing and charging lithium-ion batteries in fire-resistant containers can help prevent catastrophic situations. These containers are specifically designed to safely store and charge batteries, minimizing the risk of fire and explosions and helping to avoid any damage to property and life.

Can a lithium battery be shipped?

If a lithium battery has been used or damaged, then it should not be shipped. There are three packaging categories for lithium batteries if they are being shipped in a container.
