

WALMER ENERGY

# Can solar glass be used as tiles

## Overview

---

Solar glass can potentially be used as roof tiles, windows in houses and workplaces, car sunroofs, or even in cell phones in order to generate electricity. What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Can solar tiles produce heat?

The 44 W, 59.5 cm x 48 cm tile can also produce heat for residential systems. From pv magazine Germany Paxos Solar, a German building-integrated photovoltaic (BIPV) specialist, has developed a new solar tile that not only generates power but also produces heat for heat pumps.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Can a glass-glass PV tile work with a heat pump?

Paxos Solar has developed a new glass-glass PV tile that integrates with heat pumps, featuring Longi's back-contact solar cells. The 44 W, 59.5 cm x 48 cm tile can also produce heat for residential systems. From pv magazine Germany

## Can solar glass be used as tiles
