

# Can solar lights be retrofitted for home use

## Overview

---

Can solar outdoor lights be reused?

As you take apart your solar outdoor lights to remove the bulbs and batteries, you will also have access to other components, such as the printed circuit board (PCB), photoresistor and photocells. If you are particularly handy or have plans for solar-powered projects, you may be able to reuse these components in future ventures.

Should you retrofit a solar energy system?

Let's say you've owned a solar energy system for several years, and over time, your energy needs have expanded. Whether you need more power to charge a new electric vehicle or because of increased home consumption (maybe you invested in a new heat pump), there are many reasons why people may want to retrofit an existing solar energy system.

Can You retro-fit solar powered pole lights to existing poles?

The wallet is slim and so are your options, so you want to keep the existing poles without installing new ones. The good news is that yes, you can "retro-fit" solar powered pole lights onto existing poles. The bad news is not with every pole. [If You're Not Using a Solar Lamp Post.](#)

How do you install a solar retrofit pole?

The installation is mostly just drilling, placing the components, and then connecting the wires. [What Kind of Light Fixtures Work with Solar Retrofitting?](#)

A typical light fixture for a retro-fit pole is the all-in-one, which combines the light fixture, solar panel, and battery in one unit.
