# Can solar panels be built on the roof of a gas station

## Overview

---

How many solar panels on a petrol station roof?

these two petrol stations now have panels on the main grey roofs, must be about 30 on each. Reply to Solar PV on a petrol station roof?

in the Solar PV Forum | Solar Panels Forum area at [ElectriciansForums.net](http://ElectriciansForums.net).

Where can solar panels be installed?

They can be installed on the roofs of petrol stations or as adjacent solar canopies integrated with our solar-powered EV charging stations. Our exclusive Power Optimizers extract the most energy generation possible from each panel while lowering O&M costs and reducing your business's carbon footprint.

Can solar panels be installed on the roof?

Solar panels can be installed on the roof of a self-sufficient modular home or they can be free standing in an open area. In some areas, it is even possible to have a company install solar panels on the roof of your home for free, though you will then be purchasing the electricity directly from them (albeit at a lower price than you're probably paying now).

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.
