

# Can the solar inverter be converted to 380v

## Overview

---

Do you need a solar water pump inverter?

A solar pump inverter is needed to convert this DC power into alternating current (AC), which can be used to drive water pumps. Motor Compatibility: Solar water pump systems can use different types of motors based on the power requirements. Small and medium power systems often use brushless DC motors as the driving motors.

What are the features of T Series solar inverter?

T series 30kw~200kw three phase solar inverter feature: 1. With AC reactor (Protect against city power current shock) 2. Double protection. (Two fuses, including the city power security and battery power security) 3. Thyristor charging.

What is a 4 kW solar pump inverter?

4 kW solar pump inverter DC voltage range (280V, 750V), with air cooling performance and IP20 protection. It is usually used in urban water, wastewater purification, and agricultural irrigation. Solar pump inverter with RS485 communication mode, output frequency reaches 0~400 (Hz), no condensation when the humidity is below 95% RH.

What is the output frequency of a solar pump inverter?

Output frequency 0~400 (Hz) and power factor >0.99. The pump inverter supports AC and DC input, storage temperature (-20°C, 60°C) and ambient temperature (-10°C, 40°C). The solar pump inverter is easy to install and operate. 4 kW solar pump inverter DC voltage range (280V, 750V), with air cooling performance and IP20 protection.
