

Canberra Solar Container Two-Way Charging Price

Overview

How much does a solar system cost in Canberra?

Solar Choice regularly publishes articles with indicative pricing for PV systems in Australia's capital cities (including Canberra) in our Solar Choice Price Index. Based on the price index data from March 2025, we can see that in Canberra a typical 6 kw solar system would cost \$5,420 on average after deducting the STC rebate and including GST.

Should you install solar panels first in Canberra?

Many solar panels Canberra customers are installing solar panels first to lower power bills and keeping their options open to add a battery once prices come down (we expect they will over the next few years).

What is two-way charging?

Two-way charging is a two-way solar tariff for residential and business solar customers. It's designed to: encourage customers to export excess energy generated at times when it's needed the most. Why do we need two-way charging?

.

What is two-way solar pricing?

Two-way pricing was introduced to: Encourage customers to use the solar they generate in the middle of the day (rather than export) or send their exports into the grid later in the day. Exporting later in the day, when demand for electricity is highest, helps to reduce pressure on the network and keep future electricity costs down.
