

# Canberra Solar Folding Container 20kW

## Overview

---

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is eClips container roll out Solar System (Cross)?

The ECLIPS Container Roll Out Solar System (CROSS) project includes the detailed design, manufacture and testing of the Container Roll Out Solar System. CROSS is a factory assembled relocatable PV solar ground array. The CROSS development includes 20ft and 40ft configurations (CROSS20 and CROSS40).

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
