## Overview

---

What is a containerized battery energy storage solution?

The Containerized Battery Energy Storage Solution (BESS) is an advanced Lithium Iron storage unit built into a customised 20ft or 40ft container. The unit is designed to be fully scalable to meet your storage requirements. Storage size for a containerised solution can range from 500 kWh up to 6.5 MWh per container. Engineered for Anything.

What is a battery energy storage system (BESS)?

The amount of renewable energy capacity added to energy systems around the world grew by 50% in 2023, reaching almost 510 gigawatts. In this rapidly evolving landscape, Battery Energy Storage Systems (BESS) have emerged as a pivotal technology, offering a reliable solution for storing energy and ensuring its availability when needed.

What is a Bess container?

BESS containers are more than just energy storage solutions, they are integral components for efficient, reliable, and sustainable energy management. BESS containers are designed for safety and scalability. Their ability to be stacked and combined allows for customization according to project size.

What are the benefits of a Bess energy storage system?

- Flywheels: Store energy in the form of kinetic energy, suitable for short-term storage and high-power applications. BESS offer a range of benefits, from energy independence to cost-effectiveness, that make them integral to modern energy management strategies. Let's dig into them now.
