Charging solar container outdoor power in the wild

Overview

Are portable solar chargers a viable way to provide electricity outdoors?

Thanks to efficiency advances and cost decreases in solar cells, portable solar chargers are finally proving to be a viable means of providing electricity outdoors. A backcountry user might carry a smartphone, GoPros, headlamp, tablet, camera, headphones, and PLB or GPS devices.

Do you need a solar-powered off-grid charging shed?

Between my electric bikes, e-motorcycles, e-ATVs, electric tractors, and a few other things I'm probably forgetting, having a weather-sealed, solar-powered off-grid charging shed would be a big benefit.

Can you put solar power in a shipping container?

There are many ways to skin a cat, and even more ways to add solar power to a shipping container. To be fair, I cheated a bit. Well, not really cheated, but I just went with a retail solar generator system instead of DIYing that part myself from à la carte components.

How powerful is a solar power system?

With 8 kWh of stored energy and nearly 1,000W of real-world power in direct sun (and often 600-800W in less-than-ideal conditions), this is a seriously powerful system for just charging up all my EVs. This could power a tiny home or other small off-grid setup like a hunting cabin.
